OBJECTIVE

Motivated university student passionate about software development, data structures, and web technologies. Seeking to leverage strong technical, analytical, and problem-solving skills to build scalable applications and contribute to innovative tech solutions.

TECHNICAL SKILLS

- **Programming Languages:** C, Python
- **Web Technologies:** HTML5, CSS3, JavaScript
- **Core Concepts:** Data Structures & Algorithms (Trees, Stacks, Queues, Linked Lists), Software Engineering, Sorting & Searching Algorithms
- **Developer Tools & Frameworks:** Git, GitHub, GitHub Pages, Responsive Design

EDUCATION

Sai University

Undergraduate Student — B.Tech, Computing and Data Science

Focus Areas: Computing, Programming, Web Development, Data Structures & Algorithms, and Software Engineering.

PROJECTS

Medicare Plus Hospital | *HTML, CSS, JavaScript*

- Developed a responsive, multi-page healthcare website with modern frontend layouts as part of the MANTRA 2026 track.
- Implemented form validations to ensure smooth user interaction and data handling.

Mantra Insights | *JavaScript, HTML, CSS*

- Created an analytical web application designed to process data streams and generate performance insights.
- Designed interactive frontend elements to visually present metrics.

University Administration Hierarchy System | *C Programming, Data Structures*

- Designed and built an administration hierarchy system utilizing a Tree Data Structure with Child-Sibling Representation.
- Implemented core functional features including tree creation, search, node insertion/deletion, updates, validation, and staff record management.

Hospital Management System | *C Programming*

- Developed a console-based application in C to handle patient management and scheduling operations.
- Engineered functionality to add, view, search, update, and delete patient records effectively.

Personal Portfolio Website | *HTML, CSS, JavaScript, GitHub Pages*

- Built and hosted a responsive portfolio featuring modern glassmorphism UI design.
- Integrated showcase sections for academic education, key projects, technical skills, and contact links.

ACHIEVEMENTS & INTERESTS

- **Technical Mastery:** Successfully designed and implemented custom data structure algorithms (Trees, Stacks, Queues, Linked Lists) in C.
- **Interests:** Analytical Problem Solving, Sustainable Technologies, Open-Source Development.
